SIGNAL PROCESSING

Cumulative contents of Volume 37

Volume 37, No. 1, May 1993

Papers

S. Erlich and K. Yao
Convergences of adaptive block simultaneous iteration method for eigenstructure decomposition 1

G.O. Glentis and N. Kalouptsidis
Efficient solution of block linear systems with Toeplitz entries using a channel decomposition technique 15

B.J. Min and C.K. Un
A fast transversal filtering algorithm for pole-zero modeling 61

G. Sharma and V.U. Reddy
A DFT based alternating projection algorithm for parameter estimation of superimposed complex sinusoids 73

S.-C. Pei and J.-J. Shyu
Design of IIR multiband filters using IIR all-pass filters 87

A. Potamianos and P. Maragos
A comparison of the energy operator and the Hilbert transform approach to signal and speech demodulation 95

L. Deng
A statistical model for formant-transition microsegments of speech incorporating locus equations 121

F. Lu and E.E. Milios
Optimal spline fitting to planar shape 129

Short communication

R. Ojeda and E.J. Tacconi
Huffman sequences with uniform time energy distribution 141

Volume 37, No. 2, May 1994

Papers

I. Konvalinka
A new class of two-dimensional windows for bispectrum estimation 147

M. Elmaraazey
On spatial smoothing techniques for beamforming in the presence of correlated arrivals 157

H. Parthasarathy, S. Prasad and S.D. Joshi
A MUSIC-like method for estimating quadratic phase coupling 171

Elsevier Science B.V.

M.D. Veinović, B.D. Kovačević and M.M. Milosavljević
Robust non-recursive AR speech analysis 189
E.I. Plotkin, M.N.S. Swamy and Y. Yoganandam
A novel iterative method for the reconstruction of signals from nonuniformly spaced samples 203
M.J. Hinich and W.E. Weber
Estimating linear filters with errors in variables using the Hilbert transform 215
W. Philips
Coding properties of time-warped polynomial transforms 229
C.U. Padmini and P.S. Naidu
Circular array and estimation of direction of arrival of a broadband source 243
M. Barret and M. Benidir
A new algorithm to test the stability of 2-D digital recursive filters 255
S.-C. Pei and S.-B. Jaw
Two-dimensional general fan-type FIR digital filter design 265
P.-Y. Zhao, E.I. Plotkin and M.N.S. Swamy
Exponentially fading MLS estimation of two-dimensional noncausal and nonstationary SAR model parameters 275
K.N.V.L.N. Koundinya and B. Chanda
Detecting lines in gray level images using search techniques 287

Thesis alerts 301

Announcement and call for papers 307

Volume 37, No. 3, June 1994

Papers

R.C. Williamson, B. James, B.D.O. Anderson and P.J. Kootsookos
Threshold effects in multiharmonic maximum likelihood frequency estimation 309
S.M. Kuo and Z. Pan
Development and analysis of distributed acoustic echo cancellation microphone system 333
J.-M.Chen, B.-S. Chen and W.-S. Chang
Parameter estimation of linear systems with input–output noisy data: A generalized l_p norm approach 345
Y.-H. Chan and W.-C. Siu
General approach for the realization of DCT/IDCT using convolutions 357
S.-J. Yu and J.-H. Lee
Effect of random weight errors on the performance of partially adaptive array beamformers 365
A. Gallego, M.C. Carrión, D.P. Ruiz and A. Medouri
The relationship between AR-modelling bispectral estimation and the theory of linear prediction 381
C. Gonnet and B. Torresani
Local frequency analysis with two-dimensional wavelet transform 389
J.-J. Hsue and A.E. Yagle
A fast algorithm for linear least-squares smoothing and boundary value problems using number-theoretic transforms 405
G. Papakonstantinou, P. Tsanakas and G. Manis
Parallel approaches to piecewise linear approximation 415
J.P. Le Cadre and O. Zugmeyer
A new approach to the estimation of source motion parameters, Part 2 425
G.-O. Glentis and N. Kalouptsidis
Efficient multichannel FIR filtering using a single step versatile order recursive algorithm 437

Short communication

J. Kitchen
A method for estimating the coefficients of a polynomial phase signal 463
